

Transshipment Services Australia Pty Ltd (TSA) management is committed to contributing to a sustainable and clean environment and we undertake to facilitate all works without any detrimental impact on our environment with future generations in mind.

We will always:

- Promote a culture of caring for the environment;
- Be active in enforcing our environmental policies, standards and procedures and ensure that they are communicated to and understood by all our personnel;
- Actively engage our personnel in our Safety Management System and conduct periodic risk assessments in accordance with the system to ensure environmental risks are minimised;
- Ensure that our policies, standards and procedures comply with all relevant laws and regulations;
- Maintain our assets and machinery to a standard that will create minimal environmental impact; and
- Provide training and facilitate emergency clean up systems so that in the event of a spill or environmental damage, we can eliminate or minimise the environmental impact.

Ian Junk
Managing Director
